

Nat Spirit

Contemporary & Eco-friendly Table and Serveware

If life is not pink,
what color is it?

Eng:

NATSPIRIT – a European brand – designs friendly and colourful Tableware and Serveware made with unusual materials so that eating is only a source of pleasure.

Thoughtfully imagined with the professional end-users in mind, our various materials such as Silicone Enamel or Bamboo offer a real ecologically friendly alternative to traditional stoneware!

Restaurants, Caterers and Hotels can make the usability a priority while creating beautiful and meaningful concepts.

Fr:

NATSPIRIT – marque européenne – dessine et fabrique de la vaisselle et des accessoires modernes conçus à partir de matières originales.

Destinées aux professionnels, ses différentes gammes en Silicone, Acier Émaillé et Bambou, constituent une réelle alternative à la céramique traditionnelle.

Natspirit offre ainsi aux métiers de la restauration et de l'hôtellerie des collections uniques conciliant matériaux innovants, usages adaptés et designs épurés.

Silicone

Earth's Miracle

Eng:

Contrary to some pre-conceived ideas, silicone is not made of hydrocarbons or plastics but, like glass and ceramics, of silicium in the form of sand and rock.

After oxygen, silicone is the second most abundant chemical element and the most important raw material for mineral materials. So there is no risk of shortage here !

This combination of quartz rock and carbon makes unbreakable products with a never-ending life.

Our carefully developed silicone collections are the perfect sustainable alternative to any plastic tableware: Free of BPA, PVC or phthalates, there is no varnish, nor coating on the surface of our products that could fade, peel or leak harmful chemicals.

Fr:

Contrairement à certaines idées reçues, la silicone n'est pas constituée d'hydrocarbure, ni de plastique mais tout comme le verre et la céramique, de silicium.

Après l'oxygène, le silicium est le deuxième élément chimique le plus abondant et la matière de base la plus importante des matériaux minéraux. Peu de risque de pénurie donc !

Cette combinaison de quartz et de carbone rend nos collections inaltérables et incassables!

Nos collections silicone constituent une parfaite alternative durable à la vaisselle en plastique: Sans BPA, PVC ni phtalates, il n'y a ni vernis, ni revêtement sur la surface de nos produits qui pourrait s'estomper, s'écailler ou libérer des produits chimiques nocifs.

► Iconic Collection

Silicone

Eng:
*Our ICONIC Silicone collection is
lightweight & unbreakable but still
gives your table, Hotel lobby or
beachclub an unexpected elegant
touch.*

Fr:
*Notre collection ICONIC en
silicone est légère, incassable
et apporte toujours une touche
élégante inattendue à votre table,
votre bar ou votre club de plage.*

Silicone Specifications:

- 100% Silicone

Premium food grade silicone
- Perfect for Microwave and Oven up to +230°C / 450°F
- Safe contact with hot/cold food & liquid
- +230°C
-50°C
Freezer safe down to -50°C / -58°F
- BPA free

Free of Plastic, BPA, PVC or phthalates
- Extra resistant & durable- does not break if dropped
- Dishwasher safe, Easy to clean and stain resistant
- Hippoallergenic, minimises the risk of allergies

All products undergo regular and rigorous testing according EU regulations 1935/2004. Audits & Certifications:

Enamel

Modern Nostalgia

Eng:

Discovered as far back as over few hundreds years ago - is a material produced by fusing powdered glass to a metal substrate at high temperatures (about 850°C).

Covering steel elements with enamel protects the base material from rust and guarantees health and safety.

Our Enamel SMALTA collection combines natural aesthetic appeal, durability, heat resistance and ease of cleaning, making it a versatile choice for everyday professional use.

Fr:

Découvert il y a quelques centaines d'années - est le résultat de la fusion d'une poudre de verre sur un substrat métallique à une température très élevée (environ 850 °C).

Recouvrir d'émail la vaisselle en acier protège ce matériau de la rouille et garantit durabilité et hygiène aux utilisateurs.

Notre collection SMALTA en Acier Émaillé allie esthétique, durabilité, résistance à la chaleur et facilité de nettoyage, ce qui en fait un matériau versatile pour l'usage quotidien des professionnels de la restauration.

Bamboo

Fastest growing grass

Eng:

The bamboo fiber is comprised of about half bamboo fiber, a highly renewable material, and half non-toxic food-grade melamine binder, which helps to extend the life of the products.

The material is colored throughout with natural food-grade pigments: no surface treatment and no risk of leaching.

Our bamboo is responsibly-sourced and managed from its origin until production. It is 100% traceable, collected as sawdust waste from chopstick factories.

Fr:

La fibre de bambou - réduite en fine poudre - est associée à une résine alimentaire afin d'assurer la robustesse et la pérennité du produit.

Le matériau est teinté dans la masse grâce à des pigments alimentaires naturels: aucun traitement de surface et aucun risque de rejet.

Collecté sous forme de sciure dans les usines de baguettes, notre bambou - tracé depuis son origine jusqu'à la production - provient d'une source responsable.
